

QUARKUS INSIGHTS

Episode #115

# What's new in Infinispan

23/01/2023

Katia Aresti  
Infinispan (Red Hat)

Fabio M. Ercoli  
Infinispan (Red Hat)

# Katia Aresti

- Principal Software Engineer
- Core member of Infinispan
- Quarkus Contributor since 1.0
- Red Hatter since March 2017
- Devvxx France CFP since 2015
- Java Champion
- LinkedIn Learning instructor

# Fabio Massimo Ercoli

- Senior Software Engineer
- Infinispan Core Member
- Former Hibernate Team (4 years)
- Former Middleware Consultant
- Red Hatter since March 2016
- Working on NoSQL since 2012
- Leading indexing, query, data transcoding, metrics and tracing aspects at Infinispan

# Infinispan

100% Open-Source, In-Memory Distributed Data (caches)

Interoperability

Resilient  
Fault Tolerant Data

ACID Tx

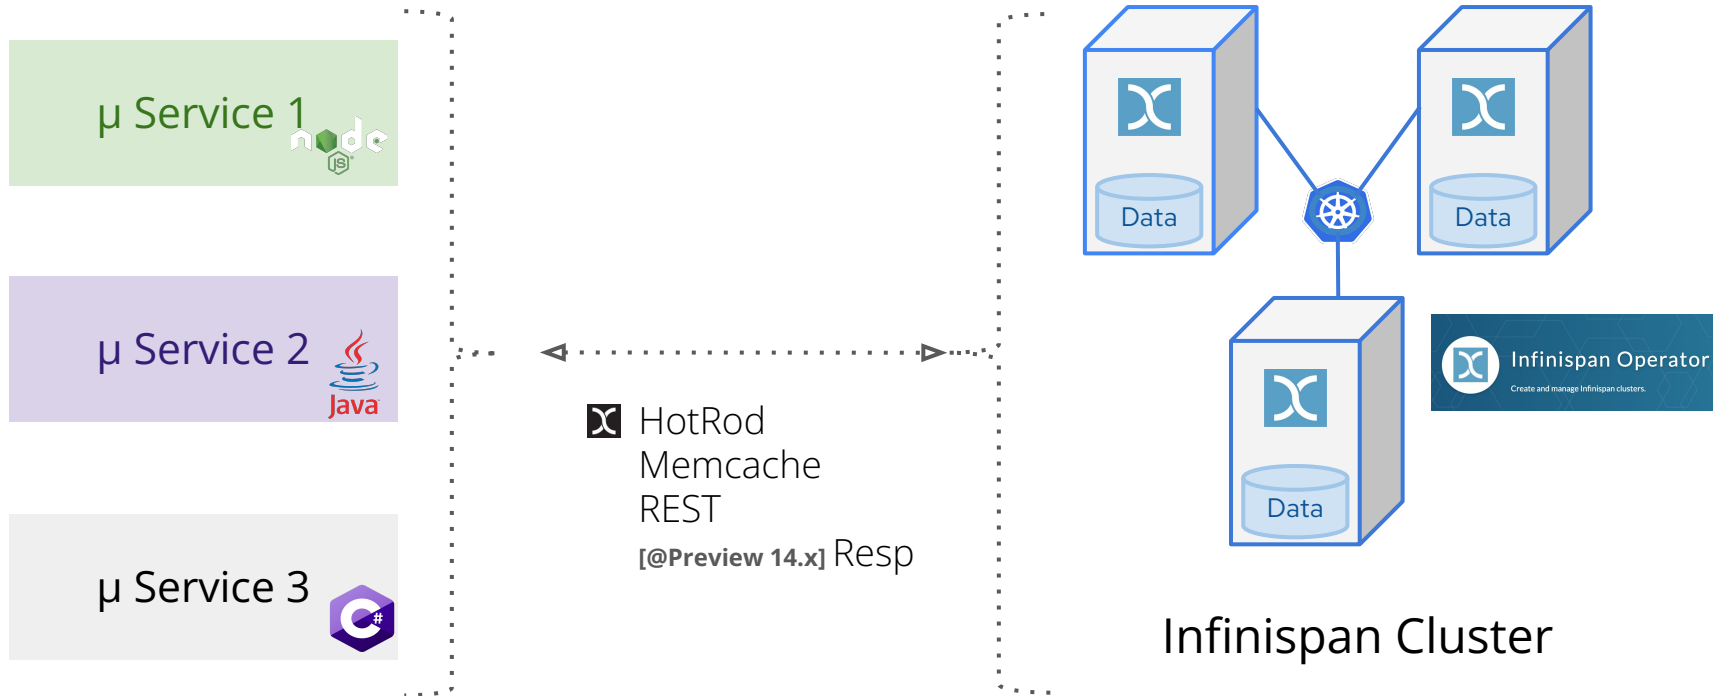

Clustered Processing

Query

# Infinispan Client-Server

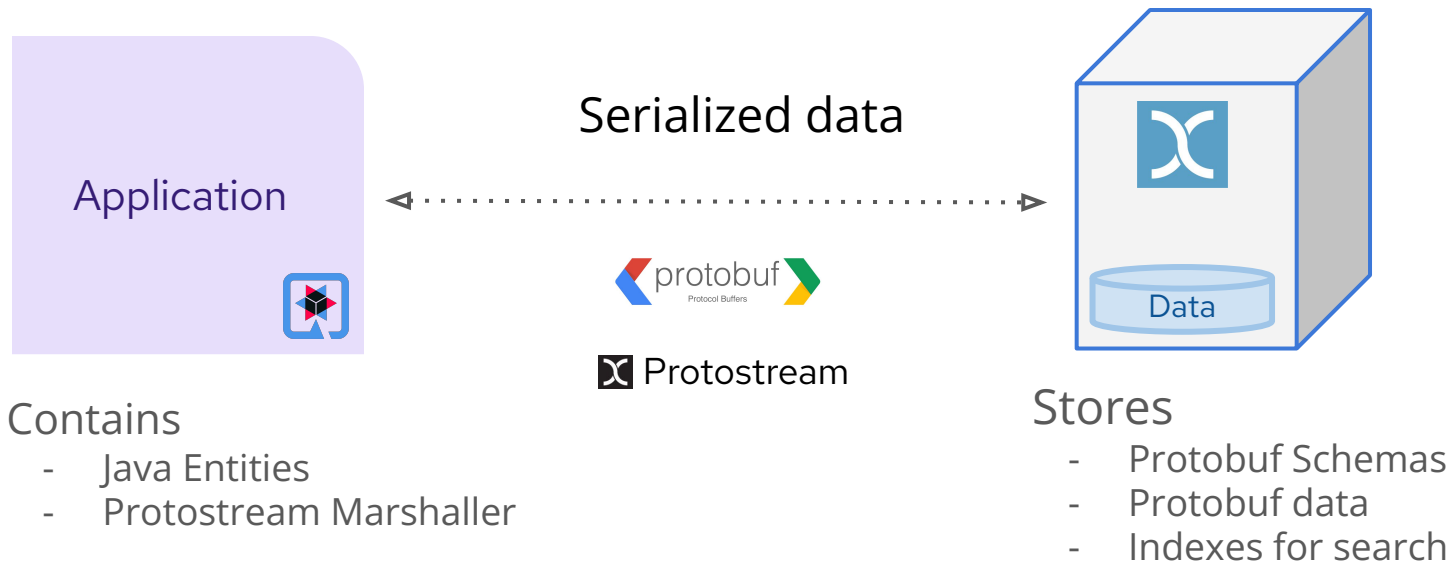

# Since Quarkus 1.x Infinispan Client Extension

- Integration with Infinispan Server from version 1.0
  - Infinispan Embedded community project
- Counters Integration
- Protostream marshalling integration

```
@Inject
@Remote("authors")
RemoteCache<String, Author> authors;

@Inject
CounterManager counterManager;
```

# Java Entities, Marshalling and Indexing

# Protostream and Indexing until Infinispan 13.x

Book.java

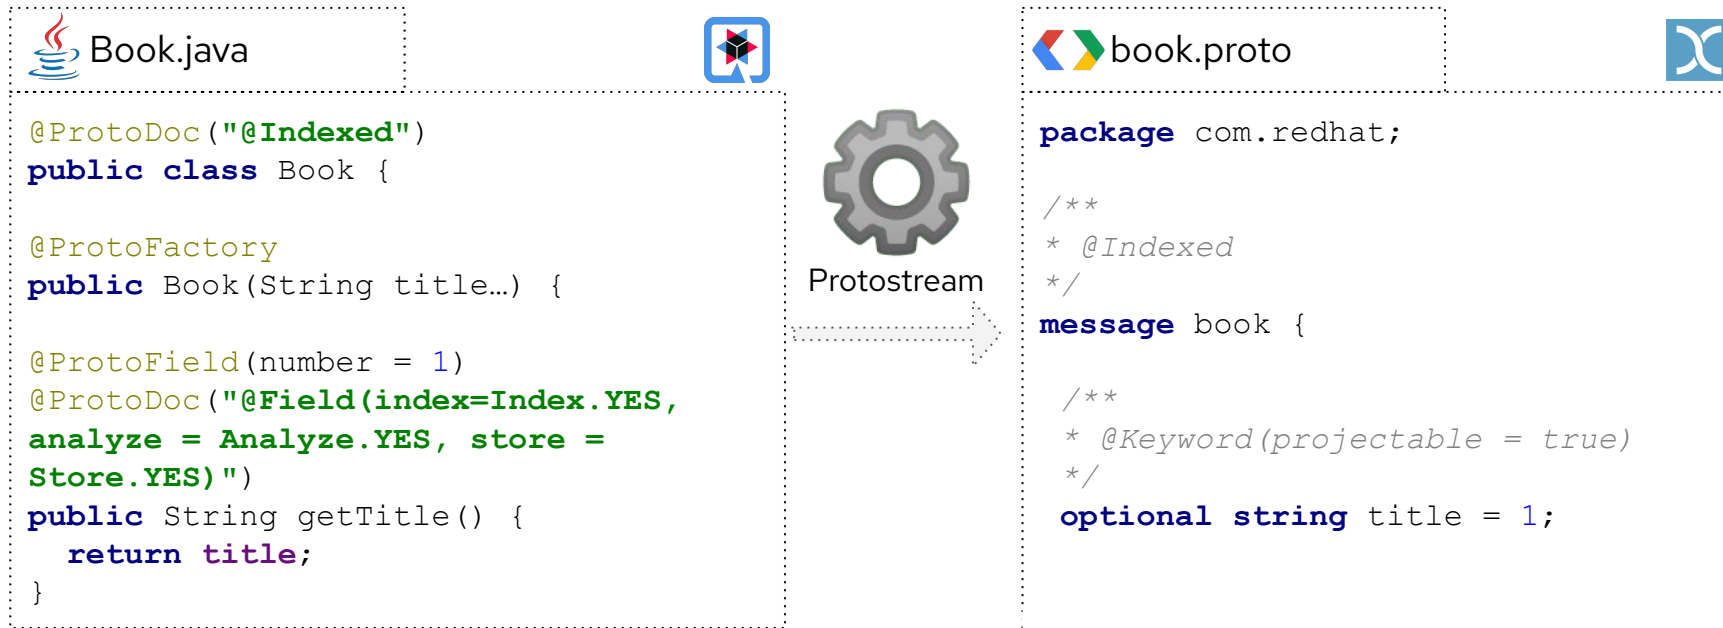

```
@ProtoDoc("@Indexed")
public class Book {

    @ProtoFactory
    public Book(String title...) {

        @ProtoField(number = 1)
        @ProtoDoc("@Field(index=Index.YES,
            analyze = Analyze.YES, store =
            Store.YES)")
        public String getTitle() {
            return title;
        }
    }
}
```

# Protostream and Indexing until Infinispan 13.x

# Quarkus 2.5.x and Infinispan

- **Infinispan 14.x**
- 0 configuration start mode with Dev Services
- Creating caches on startup
  - Default minimal configuration for caches
- Near caching configuration
- Microprofile Health integration
- New Indexing Annotations
- Caching annotations
- Kubernetes Service Binding
- OpenTelemetry integration

## HIBERNATE SEARCH 6

```
@Indexed
public class Book {

    @ProtoFactory
    public Book(String title...) {

        @ProtoField(number = 1)
        @Keyword(sortable = true)
        public String getTitle() {
            return title;
        }
    }
}
```

DEMO

# Quarkus and Infinispan

- Named Configuration Support

```
@Inject
@InfinispanClientName("lon")
RemoteCacheManager lonSite;

@Inject
@InfinispanClientName("nyc")
RemoteCacheManager nycSite;
```

- [Preview] Infinispan new Reactive API Integration

```
@Inject
MutinyCache<String, Author> authors;
```
